

**JOURNAL OF THE
CALIFORNIA
MATHEMATICS PROJECT**

Volume 10

Fall 2019

Introduction

The *Journal of the California Mathematics Project (JCMP)* is a publication of the California Mathematics Project (CMP) and is sponsored by California State University Stanislaus and San Francisco State University. The journal supplements the official news publication of the CMP, *California Online Mathematics Education Times* (COMET), (<https://cmpso.org/comet/>).

The journal's mission is communication about mathematics education among those engaged in it – through the CMP or similar initiatives anywhere. Authors include K-12 teachers, higher education faculty, and others involved with mathematics education, such as graduate students and school leaders. The call for submissions is on-going. We do accept simultaneous submissions (copyright is retained by the author). If *JCMP* is the first to accept an article for publication, the *JCMP* publication must be cited in all other publications of that article, even in revised form.

As can be seen in this issue, the journal publishes a wide variety of submissions, including brief research and research-to-practice articles, reports of lessons and classroom practice, and book reviews. We also welcome reviews of state adopted materials and programs from authors who have experience using them.

Submission and Review of Material for Publication

Manuscripts are accepted in .rtf, .doc/.docx, and .tex formats, using 12 point Times New Roman or a font with similar size and spacing and with 1.25 inch margins on all sides. Articles are published with L^AT_EX (a production editor works with authors on formatting). List references at the end of the article in alphabetical order by first author last name with appropriate corresponding citations in the text in American Psychological Association (APA) style. See the articles in this volume for examples of appropriate style and length. For more information and the electronic submission website, please see: <https://jcmp.calstate.edu>

Submissions will be refereed and may be accepted or returned for revision. Initially, we use a double blind consideration process. To help prepare an article for publication, a referee may reach out to the author to suggest improvement.

Editorial Board

Editor-in-Chief:

Robert Stein, California State University San Bernardino, Emeritus

Associate Editors:

Mark Davis, San Francisco, California

Shandy Hauk, San Francisco State University

Angelo Segalla, California State University Long Beach, Emeritus

Viji Sundar, California State University Stanislaus

TABLE OF CONTENTS

Interview with Susie Hakansson on the Development of the California Mathematics Project VIJI SUNDAR	1
An Amazing, Space Filling, Non-Regular Tetrahedron: As Simple as $\sqrt{1}, \sqrt{2}, \sqrt{3}$ JOYCE FROST AND MARGARET (PEG) CAGLE	9
What are STEM Indicators and Why Do They Matter for Practitioners? URSULA SEXTON	19
<i>Research to Practice Sampler: Engaging Students in Cognitively Demanding Tasks</i> ADITYA P. ADIREDDA	27
<i>Book Review: Mathematical Mindsets</i>	31
